

Kingfisher Hall Up-cycling Project

Dear Children,

Now that Spring is finally here it is time to start transforming the balconies outside your classrooms with an amazing range of flowers. You will be creating your own paradise of colours and scents right outside your classrooms! We will also be working with artists to create your very own outdoor mobiles and wind chimes.

We will be using old junk which you will up cycle to transform into amazing planters. This will reduce waste and save lots of money too. Please can you bring in any used plastic bottles that you want to turn into a funky plant pot. Please bring in as many of the following as possible. Thank you!

Mr Clifford

Tin cans (washed with no sharp edges) plastic yoghurt pots. Plastic water bottles of all sizes. Old wire coat hangers. Old clothes pegs. Any other junk that could be used as an outdoor hanging mobile. Old tin cans Thank you!
